So Dock icons are kind of like links on a Web page — you need only a single click to open them.. Dock icons are a quick way to bring a hidden window or application to the front so that you can work with it again.. By Take a minute to look at the row of icons at the bottom of your display That row is the Dock, and those individual pictures are known as icons.

1. [toggle icons](#)
2. [toggle icon on click](#)
3. [toggle icon bootstrap](#)

Dock icons are odd ducks — they're activated with a single-click Most icons are selected (highlighted) when you single click and opened when you double-click.
